XXVIII. INTERNATIONAL INPP CONFERENCE IN NEURODEVELOPMENT

**ADHD, Autism and Neurodiversity —
Understanding Diversity, Supporting
Development**

22. – 25. June 2028

Lüneburg Heath Nature Park

Neuromotor Immaturity
at the Intersection of Medicine,
Psychology and Education

Bringing Practice and Science together!

INPP

DEUTSCHLAND

2. HEIDE-KONGRESS

In the heart of the Lüneburg Heath Nature Park, experts from medicine, psychology, education and therapy will once again come together—united by the goal of rethinking the foundations of healthy development.

The conference sees itself as a **bridge between research and practice, a place of vibrant exchange, professional inspiration, and shared growth.**

The focus is on current insights into neuromotor development and, at the XXVIII. International INPP Conference, on the theme of: Neurodiversity, ADHD and Autism—symbolic of the diversity of human potential.

The aim is to connect scientific knowledge with practical experience in order to sustainably improve support for children and adults with developmental differences.

INPP Conferences—
where science and practice come together,
where development is reimaged,
where exchange inspires,
for a deeper understanding of
human development.
